

NVIDIA FY2025 RESULTS

NVIDIA Corporation reported record revenue of \$130.5 billion for fiscal year 2025 (ending January 2026), an increase of 114% year-over-year. Data Center revenue was \$115.2 billion, representing 88.3% of total revenue, driven by surging demand for H100, H200, and Blackwell GPU architectures for AI training and inference workloads. Gaming revenue was \$10.6 billion. Professional Visualization contributed \$2.0 billion and Automotive \$2.7 billion.

SEGMENT REVENUE BREAKDOWN

Segment	FY2025 \$B	YoY %
Data Center	115.2	+142%
Gaming	10.6	+4%
Professional Viz	2.0	+21%
Automotive	2.7	+55%

MARKET POSITION

NVIDIA holds an estimated 80-85% market share in AI training GPUs globally. The company's competitive advantages include the CUDA software ecosystem with over 5 million developers, proprietary interconnect technologies (NVLink, NVSwitch), and full-stack AI platform capabilities spanning hardware, networking, and software. Key competitors include AMD with its MI300X accelerator and Intel's Gaudi line, though neither has achieved comparable software ecosystem adoption.
